Anton Meier Ebsen Jørgensen

MSc Economics student | University of Copenhagen
Copenhagen, Denmark | anton.ebsen@gmail.com | antonebsen.com
ORCID: https://orcid.org/0009-0006-4129-8044

Research interests: economic history, historical demography, institutions, technology and inequality. Expected MSc completion: January 2027.

Education

MSc in Economics (in progress)

University of Copenhagen | September 2024-present | Expected completion January 2027
Selected course grades: Demography 12; AI for Humanity: Machine Decisions, Learning and Societal Consequences 10 (Danish seven-point scale).

BSc in Economics

University of Copenhagen | Awarded May 2024

Research projects and selected coursework

Bismarck's Lost Battle

Individual demography course paper | May 2026 | Grade 12
Marriage, fertility and the Kulturkampf in Prussia, 1867-1890. Historical county-panel analysis using continuous-exposure difference-in-differences. Examines overlapping religious and ethnic policies and limitations to causal interpretation.

The Danish West Indies

Joint MSc thesis | In progress | Supervisor: Paul Sharp
With Jonas Skov Nielsen and Sheng Ye Michael Chen. Responsible for transcription, data linkage and cleaning; main contributor to empirical design and planter-model calibration. Research in progress; no final findings.

Does GenAI Help Those Who Need It Most?

Group course research proposal | January 2026 | Course grade 10
With Jonas Amassa Skov Nielsen and Sheng Ye Michael Chen. Main contributor to the empirical strategy: proposed causal forests and assessment of selection into AI use. Research design only; no collected sample or estimated effects.

Globalization and the Welfare State

Joint seminar paper | June 2026
With Jonas Skov Nielsen and Sheng Ye Michael Chen. Responsible for econometric analysis and code, and writing the chapters documenting that analysis. Estimates describe associations, not causal effects.

Teaching

Student Lecturer in Excel and VBA

Djøf | 2023-present
Teach practical courses; develop exercises and course materials; provide feedback and live problem-solving support.

Methods, software and languages

Research toolkit

Panel data, fixed effects, difference-in-differences, identification diagnostics and historical data construction. Software: Python, SAS, Stata, MATLAB, GAMS, Excel and VBA. Languages: Danish (native), English (fluent), German (practical level).

Service

Volunteer transcription, Digitizing Danish West Indian Archives

Upcoming volunteer work
Will help transcribe historical documents about the Danish West Indies held in the U.S. Virgin Islands, making the archival material more accessible for research and public engagement.

Chairman, Socio-Economic Society (Socialøkonomisk Samfund)

2024-present
Planning and coordination of activities and events.
